

TT-327 Smøremiddel H1

PENETRATING LUBRICANT

- ✓ Clear, odourless and neat
- ✓ High viscosity, not sticky and antistatic
- ✓ Temperature and water resistant

Technical Info

Packing

TT-327 Smøremiddel H1 - aerosol 400ml

214601118

Product

Characteristics

Offers an optimum lubricating capacity at high stresses and is simple to apply in locations that are difficult to reach. Can be used in a large range of temperatures, without a change in its viscosity. Protects against corrosion by forming a thin layer and the low viscosity gives good penetration properties. Free from lead, animal fats and silicone.

Applications

Lubrication of machinery e.g. chain links, roller pins, cables, sprockets, stirrups, plungers, slides, guide rails, cams, castors and gears, etc.

For use in all food plants, meat plants, dairies, bakeries, canneries, breweries and bottling plants, as well as all food related vehicles, including tail lifts, fork lift trucks, curtain sides, etc.

Use

- Shake can thoroughly before use.
- Hold aerosol upright and spray from a distance of 25 to 30 cm.
