

TT-701 Kølertætning

PREVENT AND REPAIR LEAKS IN CLOSED WATER CIRCULATION SYSTEMS

- ✓ Compatible with all water-based coolants.
- ✓ Safe to use for metal and plastic parts.
- ✓ Does not clog the system and corrects noise.
- ✓ Contains additives that lubricate and others that prevent corrosion and limescale.

Technical Info

- Basis: water.
- Appearance: granular liquid with high viscosity.
- Colour: red-brown.
- pH: 11,2.
- Fire proof.
- Consumption: 1 bottle adequate for 25L liquid.
- Shelf life: 36 months, keep dry, cool and frost-proof.
- Safety measures: consult the Safety Data Sheet.

Packing

TT-701 Kølertætning - bottle 250ml

Product

Characteristics

Kølertætning is a safe system to repair quickly and permanently leaks in closed water circulation systems. Kølertætning can be used in all types of radiators and is compatible with all types of water-based coolants. Kølertætning does not clog up and contains additives that prevent corrosion and that stimulate the lubrication of the water pump.

Applications

- Fast and permanent repair of leaks in radiators and gaskets.
- Fast and permanent sealing of hair cracks in engine blocks and cooling coils.
- Ideal as preventive maintenance to avoid leaks.
- Fast and efficient repair of small leaks in closed heating systems.

Use

- Bring engine to operating temperature.
- Turn on the heating.
- Shake well before use.
- Pour into the radiator.
- Let the engine run for 5 minutes.
- Return coolant level.

Treats up to 25 liters of water. First clean contaminated circuits with TT-706 Kølerrens.
